

MINI PROJECT

Bi-Weekly Report-2

Prepared by: MANU THOMAS
Under The Guidance Of: Prof. AJAY JAMES

February 9, 2012

1 Title:

Intelligent power saving system

2 My Study:

- Browsed Internet for doing feasibility study.
- Did feasibility study and submitted the feasibility study report with other group members.
- Collected details on the process model, incremental model.
- Studied some process model and finally selected the incremental model for doing the project and submitted the report.
- Read about requirement engineering to perform requirement elicitation.
- Made the questionnaires and gave it to some stakeholders to collect the requirements for our system.
- Submitted the document showing plan for requirements elicitation
- Collected some details about the Microcontroller (PIC16F72)
- Read about software requirement specification in reference books.
- Started to make the SRS document.
