MINIPROJECT

Bi-Weekly Report
Group No:06
Guided By:Ajay James
Done By:Merin Mathew

March 22, 2012

1   Title:

Intelligent power saving system

2   My Study:

- Studied the available components and changed the block digram in order to implement a demo.

- Brought the basic components.

- Tested each components seperately to ensure working.

- Started to implement each circuits on the PCB seperately.

- Studied the working and implementation of the basic protocol.

- Prepared the complete algorithm to be implemented.

- Started to code the algorithm in C.

- Started to prepare the documents needed.

- Studied alternatives available for thermostat and its coding.

- tested the implemented circuits.
